Tanium API Updates April 2024

~ What's New? ~

Tanium Gateway GraphQL

- The **endpointsCounts query** has been added to support counting questions. This capability is available at an experimental stability level and is still under development.
- The **query.endpoints.edges.node.sensorReading** field has been added to coerce the result returned by a sensor to another data type. This capability is available at an experimental stability level and is still under development.
- The **endpoints query** has been enhanced with the ability to **sort** the returned endpoints based on a single field or sensor column. This capability is available at an experimental stability level and is still under development.
- The **packageSpecs** and **sensors queries** have been enhanced with the option to return **lastUpdatedBy**, which is the last user that updated the object. This capability is available at a Stable stability level.

~ Changes and Fixes ~

Tanium Connect

- No Changes

Tanium Gateway GraphQL

- Several fields in the schema were missing Stability level and Deprecation information in their descriptions. The missing data has been added.

Platform REST API

- No Changes

Module REST APIs

- No Changes

~ Deprecation Notices ~

Tanium Gateway GraphQL

- Support ends **February 2025** for the following fields:
  - **query.endpointLastSeen**
- Support ends **November 2024** for the following fields:
  - **mutation.closeDirectConnection**
  - **mutation.killProcess**
  - **mutation.openDirectConnection**
  - **mutation.pingDirectConnection**
  - **query.directEndpoint**
- Support ends **May 2024** for the following fields:
  - **query.endpoints.edges.node.software**
- Support has ended for the following deprecated fields, and they may be removed from a future release without additional notice:

    - **query.directEndpoint.performance.memoryUsagePercent**
    - **query.lastActionDetails (id)**
    - **query.lastActionResults (id)**
    - **mutation.createAction (action: {<arguments>})**
    - **mutation.deleteAction (name)**
    - **query.assets**
    - **mutation.installSoftware**
    - **mutation.removeSoftware**
    - **mutation.upsertEntity**
    - **query.directConnection**
    - **query.endpoints.edges.node.diskSpace**
    - **query.endpoints.edges.node.memory.used**
    - **query.endpoints.edges.node.memory.usedPercentage**
