Tanium API Updates August 2024

~ What's New? ~

Tanium Gateway GraphQL

- No New Features
- Full On-Prem Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6418.html
- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6242.html

Platform REST API

- No New Features

Module REST APIs

- **Threat Response API** now supports **Endpoint Reactions**. Reactions provide independent endpoint automation for attack disruption and real time incident response. API supports creating, managing, and linking reactions to Intel documents. See the User Guide for details: https://help.tanium.com/bundle/ug_threat_response_cloud/page/threat_response/reactions.html

Tanium Connect

- Users can now send data to **Microsoft Azure Blob Storage** and save the data as an append blob, block blob, or page blob file. Details are available in the User Guide: https://help.tanium.com/bundle/ug_connect_cloud/page/connect/external_store_blob.html
- HTTP Destinations now support the option to batch by byte count in addition to the existing option to batch by record count.
- Full On-Prem Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6390.html
- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/5330.html

~ Changes and Fixes ~

Tanium Connect

- No Changes

Tanium Gateway GraphQL

- ⚠ **BREAKING CHANGE** – The **risk** fields in the **endpoints query** that retrieved the Risk Score 1.0 have been deprecated. The **sensorReadings** field on the **endpoints query** should be used instead to directly retrieve the Risk Score 2.0 value from the **Risk Score** sensor. Complete details for using Risk Score 2.0 are found here: https://help.tanium.com/bundle/ug_benchmark_cloud/page/benchmark/risk_score.html
- ⚠ **BREAKING CHANGE** – Gateway functionality in support of an older Salesforce integration has been deprecated.
- ⚠ **BREAKING CHANGE** – An authorization check has been added to **mutation.apiTokenRotate** to allow only the token owner to rotate a given API token.

Platform REST API

- No Changes

Module REST APIs

- No Changes

~ Deprecation Notices ~

Tanium Gateway GraphQL

- Support ends **March 2026** for the following fields:
  - mutation.deleteConfigurationItemElement
  - mutation.deleteRelationship
  - mutation.importConfigurationItemEntities
  - mutation.mergeConfigurationItemElements
  - mutation.syncAssets
  - mutation.updateConfigurationItemProperties

    - mutation.upsertRelationship
    - query.configurationItemEntities
    - query.configurationItemProperties
    - query.configurationItemRelationships
    - query.endpoints.edges.node.configurationItem
    - query.endpoints.edges.node.risk
    - query.endpoints.edges.node.risk.assetCriticality
    - query.endpoints.edges.node.risk.criticalityScore
    - query.endpoints.edges.node.risk.riskLevel
    - query.endpoints.edges.node.risk.totalScores
    - query.endpoints.edges.node.risk.vectors
    - query.relationshipTypes
- Support ends **February 2025** for the following fields:
    - **query.endpointLastSeen**
- Support ends **November 2024** for the following fields:
    - **mutation.closeDirectConnection**
    - **mutation.killProcess**
    - **mutation.openDirectConnection**
    - **mutation.pingDirectConnection**
    - **query.directEndpoint**
- Support has ended for the following deprecated fields, and they may be removed from a future release without additional notice:
    - **query.endpoints.edges.node.software**
    - **query.directEndpoint.performance.memoryUsagePercent**
    - **query.lastActionDetails (id)**
    - **query.lastActionResults (id)**
    - **mutation.createAction (action: {<arguments>})**
    - **mutation.deleteAction (name)**
    - **query.assets**
    - **mutation.installSoftware**
    - **mutation.removeSoftware**
    - **mutation.upsertEntity**
    - **query.directConnection**
    - **query.endpoints.edges.node.diskSpace**
    - **query.endpoints.edges.node.memory.used**
    - **query.endpoints.edges.node.memory.usedPercentage**
