Titans Community Webinar: Getting Tanium Data with Gateway
September 25th at 8am PT | 11am EST
Calling all builders! Learn best practices, get tips and tricks, and come with your questions about using Gateway to get Tanium data from your organization's endpoints. Come join the conversation! Look for an email with signup details soon.

Register now! Converge 2025 in Orlando
We are very excited to announce that the 2024 Tanium Developer Summit was such a success, that this year it is transitioning from virtual to a Live and In-Person event at Converge! It will be held on Thursday, November 20th. If you don't see the option with your converge registration, please email developersummit@tanium.com.

~ What's New? ~

Tanium Gateway GraphQL

- **Reporting filtering** has some significant improvements, such as the ability to choose if and where per-line filtering is applied. You can continue to retrieve reports with the reportResultData query. For details, see the release notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/5842.html#Tanium_Cloud_Release_Date_Starting_On:_July_8th,_2025
- The following fields have been added to the endpoints query support retrieving endpoint specific CVE impacts. These capabilities are available at an Experimental stability level.
    - **query.endpoints.edges.node.compliance.cveFindings.detectedCPEs** - list of Common Platform Enumerations (CPEs) on the endpoint affected by a CVE.
    - **query.endpoints.edges.node.compliance.cveFindings.detectedProducts** - list of products installed on the endpoint that a CVE is known to affect. · Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6242.html#Cloud_Release_Starting_on:_August_07,_2025
- The **taskResult** field has been added to the PlaybookRunStep object to give the result of a task performed by a step when that step has an associated task result. This replaces

the **confirmationResult** and **progress** fields, which are now deprecated. This is available at an Experimental stability level.
    - This is available in the **steps.taskResult** field in the response of the playbookRun query and the **edges.node.steps.taskResult** field in the response of the playbookRuns query.
    - The complete list of new types is documented in the AutomateTaskResult union.

- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6242.html#Cloud_Release_Starting_on:_August_07,_2025
- Full On-Prem 2025H1 Release Notes: https://help.tanium.com/bundle/2025H1_releasenotes/page/modules.html#tanium_gateway
- On-Prem Maintenance Releases for Security and Bug Fixes: https://help.tanium.com/bundle/2025H1_releasenotes/page/maintenance.html

Tanium Connect

- Added **Definition Last Modified** column to the Tanium **Comply (Findings) - Vulnerability Findings** source
- Added **Cloud Storage** destination for **Tanium Reporting (Reports and Dashboards)** source

- Full On-Prem Release Notes: https://help.tanium.com/bundle/2024H2_releasenotes/page/modules.html#tanium_connect
- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/5330.html#Cloud_Release_Starting_on:_July_17,_2025

~ Changes and Fixes ~

Tanium Gateway GraphQL

- **BREAKING CHANGE** – **Behavior Deprecation July 2025**: The EndpointSourceTDS input to the **endpoints query** currently allows both **allNamespaces** and **namespaces** fields to be included.
    - If both `allNamespaces` and `namespaces` are specified: - The query currently uses `allNamespaces` and ignores `namespaces`.
- **BREAKING CHANGE** – The following fields are now deprecated:
    - query.playbookRun.steps.confirmationResult
    - query.playbookRun.steps.progress
    - query.playbookRuns.edges.node.steps.confirmationResult
    - query.playbookRuns.edges.node.steps.progress

Module REST APIs

- **Threat Response**:

- The maximum value allowed for the **limit** query parameter for the GET /threat-response/api/v1/conns/{cid}/views/{type}/events endpoint has been increased from 100 to 1000.
- The maximum value allowed for the **limit** input field for the POST /threat-response/api/v1/export endpoint has increased to 10,000 for DEC connections and 500,000 for snapshots.
- The maximum value returned from GET /threat-response/api/v1/conns/{cid}/views/{type}/eventsCount in the **count** field is now 100,000 instead of 1,000,000

~ Deprecation Notices ~

Module REST APIs

- Support will end for the following endpoints:
  - GET /plugin/products/asset/v1/settings/{name}
  - PUT /plugin/products/asset//v1/settings/{name}
  - POST /plugin/products/comply/v1/exports/:assessmentHash

Tanium Gateway GraphQL

- Support ends **December 2026** for the following behaviors:
  - EndpointSourceTDS Input allowing namespaces and allNamespaces fields to be included together
- Support ends **December 2026** for the following fields:
  - query.playbookRun.steps.confirmationResult
  - query.playbookRun.steps.progress
  - query.playbookRuns.edges.node.steps.confirmationResult
  - query.playbookRuns.edges.node.steps.progress
- Support ends **November 2026** for the following fields:
  - mutation.playbookUpsert.playbook.canRun
  - mutation.playbookStart.playbookRun.playbook.canRun
  - query.playbookRuns.edges.node.canRun
  - query.playbooks.edges.node.canRun
  - query.playbookSchedules.edges.node.playbook.canRun
  - mutation.playbookStart.playbookRun.steps.playbookStep.currentUserMissingPermissions
  - mutation.playbookUpsert.playbook.runs.edges.node.steps.playbookStep.currentUserMissingPermissions
  - query.playbookRuns.edges.node.steps.currentUserMissingPermissions
  - query.playbooks.edges.node.steps.currentUserMissingPermissions
  - query.playbookSchedules.edges.node.playbook.steps.currentUserMissingPermissions
- Support ends **June 2026** for the following fields:
  - mutation.assetsImport
- Support ends **March 2026** for the following fields:
  - mutation.deleteConfigurationItemElement
  - mutation.deleteRelationship

    - mutation.importConfigurationItemEntities
    - mutation.mergeConfigurationItemElements
    - mutation.syncAssets
    - mutation.updateConfigurationItemProperties
    - mutation.upsertRelationship
    - query.configurationItemEntities
    - query.configurationItemProperties
    - query.configurationItemRelationships
    - query.endpoints.edges.node.configurationItem
    - query.endpoints.edges.node.risk
    - query.endpoints.edges.node.risk.assetCriticality
    - query.endpoints.edges.node.risk.criticalityScore
    - query.endpoints.edges.node.risk.riskLevel
    - query.endpoints.edges.node.risk.totalScores
    - query.endpoints.edges.node.risk.vectors
    - query.relationshipTypes
- Support has ended for the following deprecated fields, and they might be removed from a future release without additional notice:
    - **query.endpointLastSeen**
    - **query.endpoints.edges.node.software**
    - **query.directEndpoint.performance.memoryUsagePercent**
    - **query.lastActionDetails (id)**
    - **query.lastActionResults (id)**
    - **mutation.createAction (action: { })**
    - **mutation.deleteAction (name)**
    - **query.assets**
    - **mutation.installSoftware**
    - **mutation.removeSoftware**
    - **mutation.upsertEntity**
    - **query.directConnection**
    - **query.endpoints.edges.node.diskSpace**
    - **query.endpoints.edges.node.memory.used**
    - **query.endpoints.edges.node.memory.usedPercentage**
    - **mutation.closeDirectConnection**
    - **mutation.killProcess · mutation.openDirectConnection**
    - **mutation.pingDirectConnection**
    - **query.directEndpoint**
