Tanium API Updates
June/July 2025

~ What's New? ~

Tanium Module API Documentation is moving!
The documentation will now be hosted at https://developer.tanium.com/apis/api_intro. The API specification for some modules has already moved and the remaining modules will follow in the coming months. This change provides an improved experience for users by no longer requiring Tanium Console access to browse API documentation and enabling the ability to download the Open API specifications for modules. Links to the documentation can still be found in the same location in the module workbenches.

Register now! Converge 2025 in Orlando
We are very excited to announce that the 2024 Tanium Developer Summit was such a success, that this year it is transitioning from virtual to a Live and In-Person event at Converge! It will be held on Thursday, November 20th. If you don't see the option with your converge registration, please email developersummit@tanium.com.
Speak at Converge! https://converge.tanium.com/2025/call-for-papers

Tanium Gateway GraphQL

- The following queries and mutations have been promoted to the stability level **'3 – Stable'**: mutation.playbookSchedule, mutation.playbookStart, mutation.playbookUpsert, query.playbook, query.playbooks, query.playbookRun, query.playbookRuns, query.playbookSchedule, query.playbookSchedules
- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/6242.html#cloud_release_starting_on_april_10_2025edit
- Full On-Prem 2025H1 Release Notes: https://help.tanium.com/bundle/2025H1_releasenotes/page/modules.html#tanium_gateway
- On-Prem Maintenance Releases for Security and Bug Fixes: https://help.tanium.com/bundle/2025H1_releasenotes/page/maintenance.html

Platform REST API

- No New Features

Module REST APIs

- Threat Response endpoint POST /threat-response/api/v1/response-actions now supports an additional type, **dynamicLiveResponse**. This enables you to create Live Response actions via API that have a Dynamic Amazon AWS S3 Configuration destination.

Tanium Connect

- No New Features
- Full On-Prem Release Notes: https://help.tanium.com/bundle/2024H2_releasenotes/page/modules.html#tanium_connect
- Full Tanium Cloud Release Notes: https://help.tanium.com/bundle/z-kb-articles-mediawiki/page/5330.html#Cloud_Release_Starting_on:_May_07,_2025

~ Changes and Fixes ~

Tanium Connect

- **BREAKING CHANGE** – The deprecated **Filter by Group** and **Include excepted findings** options have been removed for new connections in the Tanium Comply (Findings) source. To apply filtering, Include the required filters in the source Report instead. Note: Existing connections will continue to retain legacy settings.
- Microsoft Copilot configuration was moved to the Integration Gallery.

Tanium Gateway GraphQL

- No Changes

Platform REST API

- No Changes

Module REST APIs

- **BREAKING CHANGE – Tanium Comply**: Private routes in the Comply REST API that had previously been inadvertently published in the API Documentation in the Comply Workbench are being removed. If you are currently using any routes with /**private**/ in the path, contact us at integrations@tanium.com as soon as possible so that we can help you migrate to supported functionality. The following routes are being removed and should not be used: o GET /plugin/products/comply/private/labels o POST /plugin/products/comply/private/bundles
    - POST /plugin/products/comply/private/results/nmap
    - DELETE /plugin/products/comply/private/results/aggregate
    - GET /plugin/products/comply/private/aggregate/:id
    - GET /plugin/products/comply/private/reportsForFilter
    - POST /plugin/products/comply/private/exports
    - POST /plugin/products/comply/private/exports/findings/:uuid
    - POST /plugin/products/comply/private/vulnerability-sources/feeds
- **BREAKING CHANGE – Tanium Comply**: The following endpoint in the Comply Rest API has been deprecated. If you are using this route, contact us at integrations@tanium.com as soon as possible so that we can help you migrate to supported functionality.
    - POST /plugin/products/comply/v1/exports/:assessmentHash
        - This deprecation is the result of an architectural update to Comply's data model. Findings have not been associated with individual assessments for some time and are aggregated across assessments to eliminate duplication. As a result, exporting findings by assessment is no longer recommended. Findings should instead be retrieved through Tanium Gateway, which aligns with the updated data model
            - Examples for retrieving Comply Findings with Gateway Endpoints
              Query: https://help.tanium.com/bundle/ug_comply_cloud/page/comply/comply_gateway_examples.html and with Gateway reportResultData
              Query: https://help.tanium.com/bundle/ug_reporting_cloud/page/reporting/reporting_gateway_examples.html#get_report_data
- **BREAKING CHANGE – Tanium Asset**: The following endpoints in the Asset Rest API have been deprecated for On-Prem Tanium instances and removed for Tanium Cloud. There are no replacement routes. If you are using this route, contact us at integrations@tanium.com as soon as possible so that we can help you migrate to supported functionality.
    - GET /plugin/products/asset/v1/settings/{name}
    - PUT /plugin/products/asset/v1/settings/{name}

~ Deprecation Notices ~

Module REST APIs

- Support will end for the following endpoints:
  - GET /plugin/products/asset/v1/settings/{name}
  - PUT /plugin/products/asset//v1/settings/{name}
  - POST /plugin/products/comply/v1/exports/:assessmentHash

Tanium Gateway GraphQL

- Support ends **November 2026** for the following fields:
  - mutation.playbookUpsert.playbook.canRun
  - mutation.playbookStart.playbookRun.playbook.canRun
  - query.playbookRuns.edges.node.canRun
  - query.playbooks.edges.node.canRun
  - query.playbookSchedules.edges.node.playbook.canRun
  - mutation.playbookStart.playbookRun.steps.playbookStep.currentUserMissingPermissions
  - mutation.playbookUpsert.playbook.runs.edges.node.steps.playbookStep.currentUserMissingPermissions
  - query.playbookRuns.edges.node.steps.currentUserMissingPermissions
  - query.playbooks.edges.node.steps.currentUserMissingPermissions
  - query.playbookSchedules.edges.node.playbook.steps.currentUserMissingPermissions
- Support ends **June 2026** for the following fields:
  - mutation.assetsImport
- Support ends **March 2026** for the following fields:
  - mutation.deleteConfigurationItemElement
  - mutation.deleteRelationship
  - mutation.importConfigurationItemEntities
  - mutation.mergeConfigurationItemElements
  - mutation.syncAssets
  - mutation.updateConfigurationItemProperties
  - mutation.upsertRelationship
  - query.configurationItemEntities
  - query.configurationItemProperties
  - query.configurationItemRelationships
  - query.endpoints.edges.node.configurationItem
  - query.endpoints.edges.node.risk
  - query.endpoints.edges.node.risk.assetCriticality

    - query.endpoints.edges.node.risk.criticalityScore
    - query.endpoints.edges.node.risk.riskLevel
    - query.endpoints.edges.node.risk.totalScores
    - query.endpoints.edges.node.risk.vectors
    - query.relationshipTypes
- Support has ended for the following deprecated fields, and they might be removed from a future release without additional notice:
    - **query.endpointLastSeen**
    - **query.endpoints.edges.node.software**
    - **query.directEndpoint.performance.memoryUsagePercent**
    - **query.lastActionDetails (id)**
    - **query.lastActionResults (id) · mutation.createAction (action: { }) · mutation.deleteAction (name)**
    - **query.assets · mutation.installSoftware · mutation.removeSoftware · mutation.upsertEntity · query.directConnection**
    - **query.endpoints.edges.node.diskSpace**
    - **query.endpoints.edges.node.memory.used**
    - **query.endpoints.edges.node.memory.usedPercentage**
    - **mutation.closeDirectConnection**
    - **mutation.killProcess · mutation.openDirectConnection**
    - **mutation.pingDirectConnection**
    - **query.directEndpoint**
